During the life of your investment, the value of your assets will be affected by fluctuations in the currency exchange rate between Euros and the currency of your country. As a result, if the value of Euros strengthens relative to the currency of your country, the value of the shares expressed in the currency of your country will increase. On the other hand, if the value of Euros weakens relative to the currency of your country, the value of the shares expressed in the currency of your country will decrease.
